

NIKUNJ GARG

BCA Student | Java Developer | Unity Game Developer

Dehradun, Uttarakhand, India

Email: gargnikunj991@gmail.com

GitHub: <https://github.com/gargnikunj991-ux>

SUMMARY

First year Bachelor of Computer Applications student at Shri Guru Ram Rai University with strong interest in software engineering and game development. Focused on building logical systems using Java and interactive gameplay mechanics using Unity. Experience developing console applications, gameplay systems, and algorithm implementations while actively learning software architecture and version control.

EDUCATION

Bachelor of Computer Applications (BCA)

Shri Guru Ram Rai University, Dehradun

2025 – 2028

Relevant Areas of Study:

Programming Fundamentals, Data Structures, Algorithms, Object Oriented Programming

TECHNICAL SKILLS

Programming Languages

Java, C#

Game Development

Unity Engine (2D and 3D gameplay systems)

Core Concepts

Data Structures, Algorithmic Thinking, Object Oriented Programming, Game Logic Design

Tools

Git, GitHub, VS Code

PROJECTS

Student Management System

Java Console Application

- Developed a console based application to manage student records using Java.
- Implemented CRUD operations including add, view, update, and delete for student data.
- Used ArrayList data structures for efficient record management.
- Integrated file handling to persist student data between program executions.
- Organized code using multiple classes to maintain separation of logic and data.

Unity 2D Gameplay Logic Prototype

Unity Game Project

- Built a complete gameplay loop including player movement, collision detection, and game state transitions.
- Implemented win and lose conditions with automated scene restart functionality.
- Developed a scoring system and countdown timer to control gameplay flow.
- Designed gameplay mechanics using Unity scripting and state based logic.

3D Zone Capture Game Prototype

Unity 3D Project

- Designed a single player capture zone mechanic where players must hold a control area to score points.
- Implemented timer based zone capturing and score tracking systems.
- Built gameplay boundaries and environmental constraints to control player interaction.
- Focused on core gameplay mechanics and system logic before visual polish.

ACHIEVEMENTS

CODM World Championship

Regional Phase Competitor

- Ranked in the Top 800 players in Uttarakhand during the open championship stage.

National Service Scheme (NSS)

- Selected participant for state level training camp.
- Participated in disaster response awareness training conducted with SDRF personnel.

INTERESTS

Game Development

Software Systems Design

Competitive Gaming Technology and Programming
